## Quality Policy

GivEnergy Ltd is a UK-based company specialising in renewable energy solutions, particularly focusing on energy storage systems. We design and manufacture battery storage products in our parent company facilities in China, integrating them with solar panels and other renewable energy sources. GivEnergy Ltd aims to provide efficient, cost-effective solutions to enhance energy independence and sustainability for both residential and commercial applications. Our products include hybrid inverters, batteries, and advanced software for energy management and monitoring.

As part of our commitment to delivering excellence, we operate in full conformance with ISO 9001:2015 ensuring a structured and effective Quality Management System (QMS). We achieve customer satisfaction by continually improving processes, products and services to ensure they consistently meet or exceed customer requirements. We actively seek innovative ways to enhance our offerings and ensure that our objectives align with evolving customer needs.

Our objectives, as defined at our annual Management Review Meetings, are identified, assessed and integrated into our Quality Management framework. These objectives serve as key performance indicators to measure the effectiveness of our systems and drive continual improvement.

Through regular internal and external audits, performance evaluations, and a strong culture of continuous improvement, we ensure that our Quality Management System remains effective, relevant, and aligned with our strategic vision.

GivEnergy Ltd is fully committed to upholding the principles of ISO 9001:2015 in its entirety, reinforcing our dedication to quality, innovation, and customer satisfaction
